Since then, Q Games has taken the already critically acclaimed and commercially successful PixelJunk Shooter and released its sequel, PixelJunk Shooter 2. The game is available on the PlayStation Network, and it’s been met with much critical acclaim.

The fourth game in the series, PixelJunk Shooter, was the first game that garnered critical acclaim and became a financial success. So much so that Q Games was approached to develop a sequel.

PixelJunk Shooter 2 was released in March on the PSN and introduced some gameplay elements absent from the original. Some of which made cake slices made from the chicken salad. “This is not the chicken salad you get out of the container. It’s made with real ingredients,” she said. C&P also serves home-made cake slices made from scratch by Lindor Baker.

### Restaurant uses farm fresh ingredients

By William Wade

The C&P mini mart on Union Chapel Road is known for its 100 percent whole foods. Everything that C&P serves is made using ingredients that are grown in Pembroke.

Kenny Johnson is a 10-year regular, who says he eats at C&P everyday, at least for breakfast. He said the chain that works at C&P is friendly and the food is a fair price.

### Review

Johnson said the food has been the same quality for 10 years.

C&P has lunch specials every Wednesday, Thursday and Friday. Johnson said the heart of the restaurant is in the presentation. Programmer Carrie Jacobs has worked for C&P for three years. She said she loves to cook, and her favorite menu item is a 400. She said the purchases are estimated to conserve 1,000 kilowatts of electricity and 1,300 gallons of water per year.

Overall, Holmes estimated that Mighty J’s will also save $500 a year. “We should be able to see the return on our investment in two years,” Holmes said. He said the purchases are estimated to conserve 1,000 kilowatts of electricity and 1,300 gallons of water per year.

### Foo Fighters to release Wasting Light

By Kayloni Wyatt

It’s a great achievement when a rock band can intact for more than 10 years. The Foo Fighters has exceeded that goal by continuing to make great music for 17 years.

They recently released their first single, “Rope,” from their seventh studio album, Wasting Light. It was set for release April 12.

Along with the release of Wasting Light, the band is premiering their first film on April 12, which chronicles the band’s years to-gernon. The film is directed by continue to make gui-

designs and recorded in Grohl’s garage, and it fea-
tures a collaboration with Krist Novoselic, Grohl’s former bandmate.

The album was made with no computer software, everything was done by hand. Taping the Foo Fighters taking this approach was hard, but as the first single “Rope” shows, it’s working out for the best.

Their last studio album Echoes, Silence, Patience & Grace (2007) was nominated for five Grammy Awards. The band won two of those five awards. It was an in-
credible album that showed-
casted many sides of the band. They experimented with bluegrass and dramatic effects in the album.

But, with Wasting Light there’s a strong possibility, it will trump all precon-
sented notions by wary fans.
